

# MiniMax-Compactor

German Eco Tec

# MiniMax-Compactor

German Eco Tec

# The Problem

- Waste bins in basements, parking places, garages or backyards require plenty of valuable space
- Less parking places and less storage area are the consequences

# The Problem

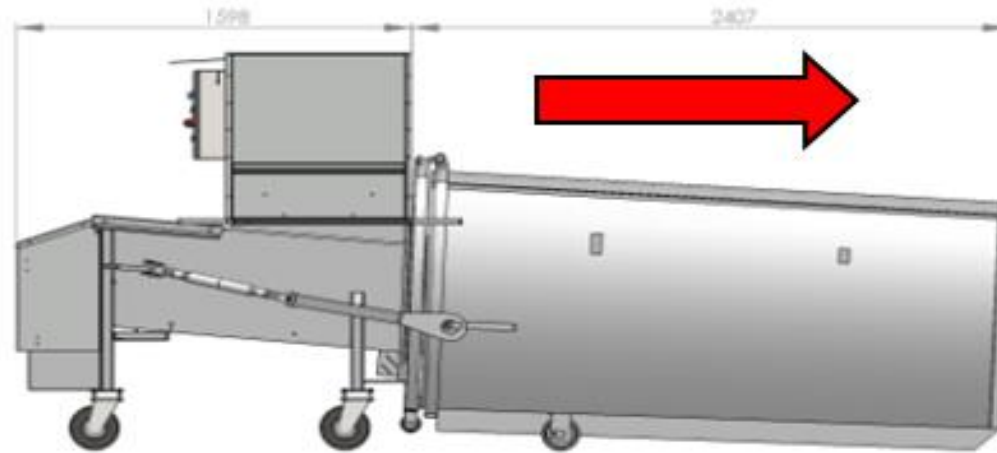

- Capacities of standard waste bins are not sufficient
- Overflow, rats, pests, vermin and smell are the consequences
- Bin handling is work intensive

# Solution: The MiniMax-Compactor

# Advantage: Compaction 1/9

- The MiniMax-Compactor consists of a compacter and a swap container with 3 qbm volume
- Compaction of up to 1:9 with a compaction force of 10.000 kg (cardboard 1:8)
- Capacity of 27 qbm of waste (about 25 x 1100 litre standard bins)

# Advantage: Compaction 1/9

MiniMax-Compactor

25 x 1100 Litre Standard Bins

=

# Advantage: Small Size

- Compared to other compactors the Mini-Compactor is small
- The dimensions are as about a parking space (4 x 2 m)
- Only 1,80 m height
- Ideal solution for low ceilings, narrow basements, storage rooms and back yards

# Advantage: Safe Space and Money

- Due to the massive compaction no more need of a waste bin fleet
- Up to 80 percent savings in confined space (up to 6 additional parking slots)
- Up to 40 percent savings in logistic costs and collection time

# Advantage: Optional Access Control

- Optional access control by key or chip card
- Access and volume monitoring

# Advantage: Mobility

- Easy handling while swapping the containers

# Advantage: Mobility

- Collection via Multi-Car or standard Skip Handlers

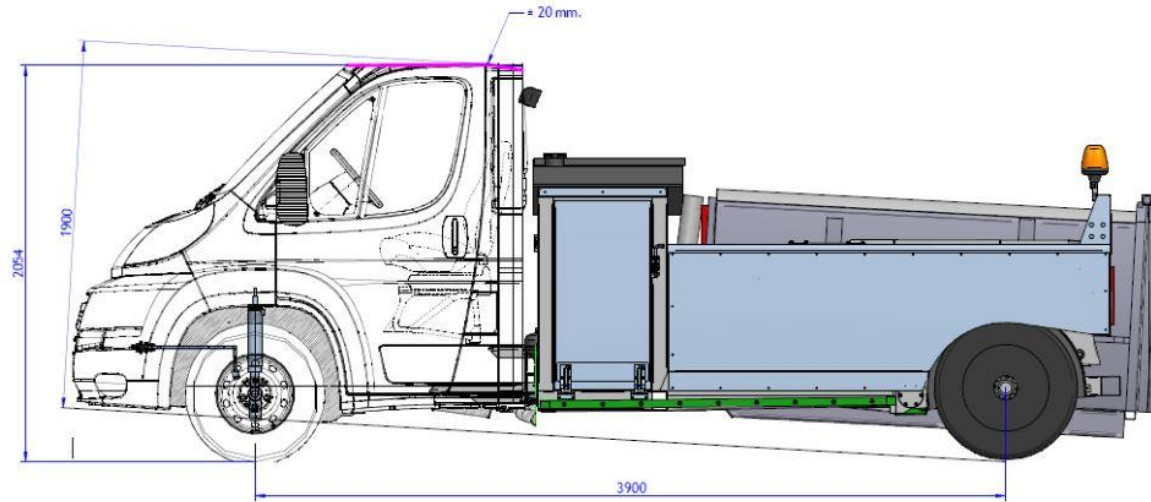

# Advantage: Mobility

- Collection via small Roll Off Tippers or Crane Truck

# Advantage: Mobility

- Dedicated vehicle for the collection of Mini-Compactor containers
- Fits even under low ceilings of 1,90 m height and into parking basements
- Available on request
- Good investment, if more Mini-Compactors are in use

# Advantage: Clean and Safe

- This totally closed compaction system provides:
  - No more overfilling
  - More cleanliness and hygiene
  - Less vermin, pests, rats, smell and danger of fire

# Advantage: Additional Options

- Optional:
  - Customized funnels suitable for waste shuts
  - Tilting devices for standard bins
  - Level detection and notification by SMS or E-Mail
  - Water drain reduces weight general waste by up to 30 %

# Advantage: Profitability and Efficiency

- Short term return on investment and costs
- Much better utilization of space: additional storage, working and parking area
- Less logistic costs for collection and handling
- Long lasting and sustainable investment because of high quality (5 mm steel)
- Depreciation 10 years and more

# Sites of Operation

- Best solution where space is confined and/or expensive:
  - Office Buildings and Multiple Dwellings
  - Retail and Shopping Malls
  - Industry and Exhibitions
  - Hotels and Restaurants
  - Universities
  - Stadium and Big Events
  - Airports, Train Stations, Ports
